

User Stories — Jewish On The Way

Actor 1: Guest (unauthenticated visitor)

#	User Story	Acceptance Criteria
G-01	As a Guest , I want to browse a list of destinations worldwide, so that I can discover cities where Jewish services are available.	Destinations load without login; sorted by distance when GPS is granted; paginated.
G-02	As a Guest , I want to view kosher restaurants in a destination, so that I can plan my meals before registering.	Restaurant list shows name, kashrut level, type, address, and opening hours.
G-03	As a Guest , I want to view synagogues in a destination filtered by denomination, so that I can find a minyan that matches my nusach.	Filter by Ashkenaz / Sfarad / Chabad / Teimanim works without login.
G-04	As a Guest , I want to use the AI smart search to find what I need in natural language, so that I don't have to navigate menus manually.	Typing "kosher meat restaurant in Tel Aviv" returns the correct category and city.
G-05	As a Guest , I want to view Shabbat candle-lighting and havdalah times for any city, so that I can prepare for Shabbat even without an account.	Times are fetched from HebCal; city search fallback shown when GPS is denied.
G-06	As a Guest , I want to use the Qibla compass to find the direction of Jerusalem, so that I can orient myself for prayer anywhere in the world.	Compass works via device orientation API; no login required.
G-07	As a Guest , I want to register for an account with my email and password, so that I can access interactive features.	Registration validates email uniqueness; password is hashed; JWT is returned.
G-08	As a Guest , I want to reset my forgotten password via email, so that I can regain access to my account.	Reset link is sent to registered email; token expires; new password is saved.

Actor 2: Registered User

#	User Story	Acceptance Criteria
U-01	As a Registered User , I want to search for nearby kosher restaurants using free text, so that I can find food that matches my kashrut level and preferences.	AI classifier extracts type (meat/dairy/pareve) and kashrut level (rabbinat/mehadrin/badatz) from the query and filters results accordingly.

#	User Story	Acceptance Criteria
U-02	As a Registered User , I want to save restaurants and synagogues to my favorites list, so that I can quickly access places I plan to visit again.	Toggle save/unsave; favorites list persists across sessions; shows restaurant and synagogue types.
U-03	As a Registered User , I want to rate and review a restaurant or synagogue, so that I can share my experience with the community.	One review per user per place; 1–5 stars; optional comment; average displayed on place page.
U-04	As a Registered User , I want to report incorrect or outdated information about a place, so that the community has accurate data.	Report types: not kosher, closed, moved, wrong info, other; report goes to admin queue.
U-05	As a Registered User , I want to suggest a new restaurant or synagogue that is missing from the app, so that the community benefits from my local knowledge.	Request form includes name, address, phone, website, kashrut details; status tracked as pending/approved/rejected.
U-06	As a Registered User , I want to create a minyan for a specific prayer time and location, so that I can gather a quorum of ten men for communal prayer.	Minyan requires prayer type, date (today or future), time, and location text; creator is recorded.
U-07	As a Registered User , I want to join an existing minyan, so that I can participate in communal prayer when traveling.	Registration is unique per user per minyan; participant count increments; limit enforced at 10.
U-08	As a Registered User , I want to leave a minyan I registered for, so that I can free up my spot if my plans change.	Unregistration removes the user's record; participant count decrements.
U-09	As a Registered User , I want to delete a minyan I created, so that I can cancel it if it is no longer taking place.	Only the creator can delete; associated registrations are removed.
U-10	As a Registered User , I want to chat in a destination's public chat room, so that I can connect with other Jewish travelers in the same city.	Messages are delivered in real time via WebSocket; all users in the destination room see the message.
U-11	As a Registered User , I want to update my profile including my kashrut level preference, so that the app can personalise restaurant recommendations for me.	Fields: first name, last name, kashrut level (none / rabbinite / mehadrin / badatz); changes saved immediately.

#	User Story	Acceptance Criteria
U-12	As a Registered User , I want to upload a profile avatar, so that other community members can recognise me in chats and reviews.	Image uploaded to Cloudinary; max 5 MB; JPEG/PNG/WebP only.
U-13	As a Registered User , I want to view synagogues near my current GPS location, so that I can find a place to pray without knowing the city name.	Uses PostGIS ST_Distance; sorted nearest-first; returns up to 10 results.
U-14	As a Registered User , I want to search for hosting offers in a destination for a specific Shabbat, so that I can find a Jewish family to stay with.	Filters: destination, arrival/departure dates, number of guests, Shabbat stay, children.
U-15	As a Registered User , I want to delete my account, so that my personal data is removed from the platform.	Soft-delete; email becomes available for re-registration; data anonymised.

Actor 3: Host (registered user offering Shabbat hospitality)

#	User Story	Acceptance Criteria
H-01	As a Host , I want to post a hosting offer for my city with availability dates and guest capacity, so that Jewish travelers can find a place to stay for Shabbat.	Offer requires destination, available-from/to dates, max guests, kashrut level, Shabbat/children flags.
H-02	As a Host , I want to view all hosting requests I have received, so that I can decide which guests to welcome.	Received requests list shows guest name, dates, number of guests, and special requests.
H-03	As a Host , I want to approve a hosting request, so that the guest knows they have a confirmed place to stay.	Status changes to approved ; both parties can open the private chat.
H-04	As a Host , I want to reject a hosting request, so that I can free the slot for other guests when I cannot accommodate someone.	Status changes to rejected ; guest is notified.
H-05	As a Host , I want to chat privately with a guest after approving their request, so that we can coordinate arrival details and meal preferences.	Real-time WebSocket chat scoped to the hosting request; only the two parties can see it.
H-06	As a Host , I want to deactivate my hosting offer when I am no longer available, so that travelers do not submit requests I cannot fulfil.	is_active flag set to false; offer disappears from search results immediately.
H-07	As a Host , I want to view all my active and past hosting offers, so that I can manage my hospitality history.	My-offers list shows all offers with status and date range.

Actor 4: Admin

#	User Story	Acceptance Criteria
A-01	As an Admin , I want to create a new destination (city), so that restaurants and synagogues in that city can be added to the platform.	Destination requires name, city, country, country code, and GPS coordinates; supports parent/child hierarchy.
A-02	As an Admin , I want to bulk-import synagogues from a JSON file for a given city, so that I can onboard an entire city's synagogue data in one operation.	Import geocodes each address via Nominatim; deduplicates by normalised name; returns created/updated/skipped/error counts.
A-03	As an Admin , I want to review candidate synagogues imported from OpenStreetMap, so that I can approve accurate records and reject duplicates or incorrect entries.	Candidate list filterable by status (pending/approved/rejected); approval promotes record to the live synagogues table.
A-04	As an Admin , I want to import kosher restaurants from Google Places for a destination, so that the restaurant catalogue stays current without manual data entry.	Imports by "kosher" keyword search; deduplicates by <code>google_place_id</code> ; stores rating, opening hours, and coordinates.
A-05	As an Admin , I want to delete a restaurant or synagogue that is permanently closed or incorrect, so that users are not directed to non-existent places.	Hard delete cascades to related reviews, reports, and favorites.
A-06	As an Admin , I want to block a user account, so that I can remove bad actors who violate community guidelines.	Sets <code>isActive = false</code> ; user cannot log in; existing JWT tokens are rejected.
A-07	As an Admin , I want to delete an abusive chat message, so that the community chat remains respectful and on-topic.	Message is removed from the destination chat immediately for all connected clients.
A-08	As an Admin , I want to review place reports submitted by users, so that I can take corrective action on incorrect or outdated data.	Reports queue filterable by status (pending/reviewed/resolved); admin can add a note and change status.
A-09	As an Admin , I want to review user-submitted place requests, so that I can add legitimate new venues to the platform.	Request detail shows all submitted fields; admin can approve (which adds the place) or reject with a note.
A-10	As an Admin , I want to re-run the AI denomination classifier on all synagogues in bulk, so that newly trained models improve the denomination tags across the dataset.	<code>POST /restaurants/reclassify</code> processes all records; returns counts of updated classifications.

Story Map Summary

Discovery	Prayer	Hospitality	Community	Administration
G-01 Browse destinations	U-06 Create minyan	H-01 Post hosting offer	U-10 Destination chat	A-01 Add city
G-02 View restaurants	U-07 Join minyan	H-02 View received requests	U-03 Rate & review place	A-02 Bulk import synagogues
G-03 View synagogues	U-08 Leave minyan	H-03 Approve request	U-04 Report a place	A-03 Approve OSM candidates
G-04 AI smart search	U-09 Delete own minyan	H-04 Reject request	U-05 Suggest new place	A-04 Import from Google
G-05 Shabbat times	U-13 Nearby synagogues	H-05 Private hosting chat	U-02 Favorites	A-06 Block user
G-06 Qibla compass		H-06 Deactivate offer	U-11 Edit profile	A-07 Delete chat message
G-07 Register		H-07 My offers history	U-12 Upload avatar	A-08 Resolve reports
G-08 Reset password			U-14 Search hosting	A-09 Resolve place requests
